Material Safety Data Sheet

1. STATEMENT OF HAZARDOUS NATURE, PRODUCT AND COMPANY IDENTIFICATION

Not hazardous according to criteria of the National Occupational Health and Safety Commission (NOHSC).
Not hazardous according to Worksafe Australia Criteria.
Not classified by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by road or rail.

PRODUCT NAME: TEA TREE ANTISEPTIC HAND CLEANSER
Synonyms: None
CAS-No: none allocated
Molecular formula: none allocated complex mixture.
Recommended use: As a high quality hair and body shampoo.
Appearance: Pale green liquid with subtle Tea-tree Oil aroma.
Supplier: Minehan Agencies Pty Ltd
ABN: 21-010-895-100
Street Address: 29 Camuglia Street Garbutt Townsville 4814 Queensland Australia
Telephone: (07) 4774 4626
Facsimile: (07) 4774 4616
Email: inquiry@minehanagencies.com.au
Emergency telephone number: 0408 777 800

2. COMPOSITION / INFORMATION ON INGREDIENTS

Acute Effects

Ingestion: Swallowing can result in nausea, vomiting, diarrhoea and abdominal pain.
Eye contact: May irritate eye/s.
Skin contact: If soreness or redness occurs, wash with soap and water. Seek medical assistance if symptoms persist.
Inhalation: Mists or aerosols must not be inhaled. These are unlikely due to methods of use.
Long Term Effects:
No information available for the product.
4. FIRST AID MEASURES
Poison Information Centres in each State capital city can provide additional assistance for Scheduled Poisons:
Phone (Australia 13 1126)

**Ingestion:** Rinse mouth with water. Do NOT induce vomiting. Seek medical assistance.

**Eye contact:** Irrigate with copious quantities of water for at least 15 minutes. Eyelids to be held open. Remove clothing if contaminated and wash skin. If present remove contact lenses. Transport to hospital or medical centre if symptoms persist.

**Skin contact:** Wash contaminated skin with plenty of soap and water. Remove contaminated clothing and launder before re-use.

If swelling, redness, blistering, or irritation occurs seek medical advice.

**Inhalation:** Remove victim from exposure – avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. Seek medical advice if symptoms persist.

**Notes to physician:** Treat symptomatically. Suggest intubation BEFORE any emesis due to the foaming properties of the product.

5. FIRE FIGHTING MEASURES

**Specific hazards:** Containers may burst if in fire. Keep containers cool by water spray or fog.

**Fire fighting further advice:** On burning may emit fumes including carbon monoxide, carbon dioxide, partially burned hydrocarbons and small amounts of oxides of nitrogen and sulphur. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion.

**Suitable extinguishing media:** If material is involved in a major fire use water fog (or if unavailable fine water spray) to keep drums cool. Use, foam, dry agent (carbon dioxide, dry chemical powder) to extinguish fires as required by other flammable/combustible components involved in the fire.

6. ACCIDENTAL RELEASE MEASURES

Wear full protective equipment to prevent contact with product. Contain- prevent run off into drains and waterways. Use absorbent (soil, sand or other inert material). Collect and seal in properly labelled Plastic containers for disposal. Wash area down with excess water. If contamination of sewers or waterways has occurred, advise local emergency services.

7. HANDLING AND STORAGE

**Storage:** Store according to local, State or Federal regulations as applicable, for a Shampoo. Store in a cool, dry place and out of direct sunlight. Store away from foodstuffs. Keep containers closed when not in use. Handle using good industrial hygiene practices.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**National occupational exposure limits**
No value assigned for this specific material by the National Occupational Health and Safety commission (NOHSC).
Use TWA of 10 mg/Cubic metre as a maximum.
As published by the National Health and Safety commission (NOHSC).
Exposure Standard (TWA) is the time weighted average airborne concentration over an eight hour working day, for a five day week over an entire working life. According to current knowledge these concentrations should neither impair the health of, nor cause undue discomfort to nearly all workers.
These exposure standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. Exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

**Engineering measures:** Control to below quoted Exposure Standards. Use with local exhaust ventilation. Keep containers closed when not in use.

**Personal protection equipment:** Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. If risk of inhalation of spray mist exists, wear combined organic vapour/particulate respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.

10. STABILITY AND REACTIVITY

Stability: Stable to 60 degrees C. Does not polymerise.

11. TOXICOLOGICAL INFORMATION

Acute toxicity / Chronic toxicity
No LD50 data available for the product.

12. ECOLOGICAL INFORMATION

To help protect the environment there is no added phosphates and very small amounts of nitrogen.
The product has been formulated using biodegradable surfactants to current Australian Standards.

13. DISPOSAL CONSIDERATIONS

Refer to State/Territory Land Waste Management Authority. May be fed to sewer or septic systems.

14. TRANSPORTATION INFORMATION

Not classified by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by road or rail.

UNNo: none allocated
Class: none allocated
Hazchem code: -
Packing group: -
Proper Shipping Name: none allocated

Segregation Dangerous Goods:
Not required.

15. REGULATORY INFORMATION

Not Hazardous according to criteria of National occupational Health and Safety commission (NOHSC)
Not Classified by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by road or rail.

RISK None allocated

Risk-phrases: none allocated

Safety-phrases:
In case of contact with eye/s, rinse immediately with plenty of water and seek medical advice.
Wear suitable gloves.
In case of accident or if you feel unwell, seek medical advice immediately (show the label wherever possible).
All of the constituents of this material are listed in the Australian Inventory of Chemical Substances.
16. OTHER INFORMATION

Reason(s) For Issue - initial issue.

This MSDS summarises at the date of issue our best knowledge of the health and safety hazard information of the product: and in particular how to safely handle and use the product in the workplace. Since Minehan Agencies Pty Ltd cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this MSDS in the context of how the user intends to handle and use the product in the workplace i.e. a risk analysis.
If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact Minehan Agencies Pty Ltd.
